Subject: Favors in the Miami-Dade Courthouse

(if this email has been directed to the wrong Division or Department, I ask that you please bring it to the attention of the correct individual(s))

Gentleman and Ladies:

Perception is reality. It appears that there are high level favors being done in the Miami-Dade courthouse.

Myron Rosner is the former mayor of North Miami Beach and his wife Sarah Zabel is an 11th Circuit Judge. Several years ago Myron was arrested and charged with various felonies and misdemeanors related to his campaign for mayor. These charges result from what is at the heart of our democracy...voting and elections.

I am told there have been more than FIFTEEN (15) continuances of the trial proceedings. To date, the charges are no closer to being tried than the day he was arrested. WHY?

Is Kathy Fernandez-Rundle asking her prosecutor to be cooperative and casually let this thing ride?

Is the presiding judge in the criminal case content letting this case sit idle so that there is no scrutiny from Judge Zabel or other members of the bench?

What the heck is going on? This is exemplary of a system where common citizens can have NO faith in justice being served...regardless of whether he is acquitted or convicted. This is exemplary of a system where the wealthy or powerful get favors that the less wealthy and less powerful don't get.

Respectfully, this should be thoroughly investigated. If we have corrupt judges presiding over or corrupt State's Attorney prosecuting corruption cases, then all is forever lost.

Please take control over this. Please.
