Subject: Re: 911 call and report - Public Records Request

We are the wrong persons to ask. The city clerk office has nothing to do with the fulfillment of Public Records Request (hereinafter PRR). We act as a hub-the public submit PRR to the clerk's office and we forward the requested information to the appropriate department. Once the department collect all the requested information, said department forwards the requested information to the clerk's office for the public to pick up. Your question can only be answered by the department that stores the records, in this case it would be either the police department or IT.
