If you want to put your aggression against the new commissioners who you seem to have tremendous angst towards, you could get busy on the crime committed against me by a previous city attorney along with the various city departments to cover up the damage done to my property years ago. I have all the names of the players and documentation. You could help me on my quest for justice! All commissioners at that time knew what happened because I came on numerous occasions for help.

Also, ask Commissioner Kramer about my latest issue concerning my roof and what the building department did!

This roofing issue started under the previous City Manager and City Attorney.
